Company background

STGI Technologies and Consulting Private Limited is the Indian subsidiary of Summit Technology Group. We are Bankers, Cloud Engineers, and Technologists. Our business helps organizations execute progressive operational and technology strategies. We believe that these strategies should leverage modern public cloud platforms and automation capabilities.

We are a fast-growing fintech company providing a cutting-edge Loan Origination and Servicing platform. Our mission is to simplify and digitize banking operations through innovative technology and deep domain expertise.

Job Title: Quality Analyst – Product Testing

Role Overview

As a Quality Analyst, you will be at the forefront of ensuring the functional integrity of our platform. This role is ideal for graduates who are passionate about technology, product excellence, and banking operations. You will begin your journey in product testing and gradually evolve into strategic roles such as ***Product Analyst, Product Owner, or Banking Operations Specialist.***

Key Responsibilities

- Understand business requirements and translate them into functional test cases.
- Perform end-to-end functional testing of loan origination and servicing modules.
- Collaborate with Product Managers, Developers, and Operations teams to identify and resolve issues.
- Document test results, track defects, and ensure timely resolution.
- Participate in UAT (User Acceptance Testing) with clients and internal stakeholders.
- Continuously improve testing processes and contribute to product quality.

Qualifications

- B.Tech.
- Strong analytical and problem-solving skills.
- Excellent communication and documentation abilities.
- Basic understanding of banking products and financial workflows.
- Interest in technology and product development.

Career Path & Growth Opportunities

We believe in nurturing talent and providing a clear growth trajectory. As you gain experience and demonstrate capability, you can transition into roles such as:

Product Analyst

- Analyse user behaviour and product performance.
- Define product enhancements and work closely with development teams.

Product Owner

- Own product modules and drive roadmap execution.
- Liaise with clients and internal teams to prioritize features.

Banking Operations Specialist

- Deep dive into operational workflows of banks – Lending, Originations, Servicing, Insurance, etc.
- Optimize processes and support client implementations.

Why Join Us?

- Work on a global product impacting banking and lending domain.
- Be part of a collaborative and growth-oriented culture.
- Opportunity to shape your career across multiple domains.
- Exposure to cutting-edge fintech solutions and real-world banking operations.
